

For many years DULON® International has been known to develop and produce high quality products for consumer, professional and industrial markets. As time goes by, a higher awareness for quality products that are environmental friendly, biodegradable and most importantly safe for humans, our ground water, rivers, lakes and oceans is a must. DULON® International invests a great amount of effort in satisfying this demand.

“A brighter future through smarter products”

Since all of the products from DULON® International are environmental friendly, DULON® has established a great share of the industrial market. According to the latest T.N.O. (TNO Environment, Energy and Process Innovation) test results in the H.O.C.N.F. form, we proudly announce that DULON® F10 Mild HD, our Industrial Cleaning Agent (rig wash) is safe for anyone to use anywhere. We do not just look at industrial maintenance and clean up as an industry, but also at the professionals who work and use our products and the consequences regarding their safety and the environment in which we all share and live.

Distributed by
